Special Issue: Selected papers from ThermaComp 2016, July 6-8, 2016, Georgia Tech, Atlanta, USA.

Editorial

This special issue collects selected papers presented at the Fourth International Conference on Computational Methods for Thermal Problems (ThermaComp 2016) held at Georgia Tech, Atlanta, USA, July 6-8, 2016. ThermaComp series (www.thermacomp.com) aims at bringing together researchers interested in fundamental numerical methods for heat and fluid flow and those who use such methods to solve complex, real life applications. This special issue includes some of the work presented by invited lecturers, as well as other leading scientists in the field.

We thank the authors for accepting our invitation to contribute their interesting work to this special issue. We are grateful to Professor R.W. Lewis for continuing to support ThermaComp and giving us the opportunity to edit this special issue.

Y. Joshi

G.W. Woodruff School of Mechanical Engineering, Georgia Institute of Technology Atlanta, Georgia.

N. Massarotti

Dipartimento di Ingegneria, Università degli Studi di Napoli "Parthenope", Napoli, Italy.

P. Nithiarasu

Civil and Computational Engineering Centre, School of Engineering, Swansea University.
