### Data Article

# Survey of public data sources on the Internet usage and other Internet statistics

Murooj Nadhom, Pavel Loskot\*

College of Engineering, Swansea University, Swansea SA1 8EN, United Kingdom

#### ARTICLE INFO

##### Article history:

Received 3 April 2018  
Received in revised form  
6 April 2018  
Accepted 25 April 2018  
Available online 9 May 2018

#### ABSTRACT

The Internet research is mainly driven by data. Obtaining such data by planning and launching measurement campaigns is rather time consuming and costly. Much more efficient, and in many cases, sufficient data acquisition strategy is to exploit the existing data-sets available in public databases, repositories, and documents. Hence, the public data sources related to the Internet usage and other Internet statistics are systematically surveyed and categorized to make the search for the Internet data much easier and faster. Extensive online searches and exploring websites of the key organizations were used to identify the data sources. Each data source was then carefully explored to describe its characteristics and contents. The data are usually aggregated over certain time periods and regions, and often indexed by age, gender, application, website, activity and other attributes. Some data sources also support various data visualization options, and offer data export in multiple formats.

#### Specifications Table

Subject area	<i>Engineering, Computer Science</i>
More specific subject area	<i>Computer networks, Telecommunications</i>
Type of data	<i>5 Table, 1 Figure</i>

\* Corresponding author.  
E-mail address: [p.loskot@swan.ac.uk](mailto:p.loskot@swan.ac.uk) (P. Loskot).

How data was acquired	<i>Survey of public datasets on WWW</i>
Data format	<i>URL with brief description</i>
Experimental factors	<i>Each dataset was explored for its contents and then categorized.</i>
Experimental features	<i>Guided searches on WWW. Search of WWW of relevant organizations.</i>
Data source location	<i>N/A</i>
Data accessibility	<i>Included with this data brief.</i>

---

### Value of the data

---

- There is no other centralized collection of public datasets on the Internet usage and other Internet statistics while searching for such datasets is a very time consuming process.
  - The identified data sources can be used to identify and understand the current and future trends in the Internet usage.
  - Having the Internet usage data and statistics is important to understand a rapidly ongoing digitalization of many sectors of the economy including manufacturing, healthcare, education and entertainment.
  - It is vital that data sources on the Internet usage are regularly updated and made available to the researchers as well as policy and decision makers in order to keep evolving the Internet for the maximum benefits of the society.
- 

## 1. Data

There are different types of data associated with the Internet. The Internet measurements are used for real-time network management, long-term network planning as well as to evaluate how the Internet is used and its impact on the economy and the society. The measurements used for network management are obtained directly from the Internet traffic flows. The network planning for 1 or 2 years ahead of the current demand is based on the traffic trend forecasting by extrapolating historical data. For longer-term planning beyond a 2 year horizon and to evaluate the long-term and large scale impacts of the Internet, the user questionnaires and other market research methods are necessary. The Internet data are regularly published by the government institutions, regulatory bodies, communication service providers, and private organizations. The data with low level of aggregation are usually only accessible for a fee. The published Internet usage data are highly aggregated which reduces the resolution, but also the variations in data. In order to obtain measurements for high volume and high throughput traffic, or to efficiently represent the Internet topology at multiple time scales, statistical sampling strategies are required to process smaller but statistically relevant traffic traces.

The collected datasets were somewhat liberally organized in the following 5 tables:

**Table 1.** Internet measurements: These datasets mostly contain data on the Internet usage in a given region such as the number of subscribers, cellular coverage, security issues and the quality of service including access speeds and response times.

**Table 2.** Internet applications: These datasets can be used to evaluate how the users spent their time on the Internet, often focusing on the specific regions of the world and specific websites such as social networking applications or Youtube.

**Table 3.** Various Internet statistics: These datasets provides information about the Internet usage and usage analytics in various parts of the world.

**Table 4.** Internet availability: These datasets are concerned with the Internet accesses in different countries and world regions.

**Table 1**  
Internet measurements.

	Data source	Data	Notes
1.	Individual usage of the Internet. The World Bank Group. <a href="http://data.worldbank.org">http://data.worldbank.org</a>	1960–2015: Number of Internet users. Fixed broadband subscriptions. Fixed telephone subscriptions. Secure Internet. servers. Mobile cell. subscriptions.	Yearly updates. XLS, XML and CSV format. Indexing by global, region, country and income. In 5 langs. <sup>b</sup>
2.	The World Factbook. The CIA. <a href="https://www.cia.gov">https://www.cia.gov</a>	2014: Number of Internet users.	Updated 2014 (15th ed.). TXT format. Indexing by country. In 8 langs.
3.	ICT facts and figures. ITU. <a href="https://www.itu.int">https://www.itu.int</a>	2000 and 2015: Internet users. 2011 and 2015: 3G mobile broadband coverage. 2005–2015: Mobile and fixed broadband subscriptions. Individuals using Internet. Household Internet access. 2008–2014: Internet prices. 2014: Internet speeds.	A report published in 2015. PDF format. Indexing by global, region, country and level of development.
4.	ICT Fact and figures. ITU. <a href="https://www.itu.int">https://www.itu.int</a>	2005–2014: Fixed and mobile broadband subscriptions. Individuals using Internet. Household Internet access 2013: Internet speeds.	A report published in 2014. PDF format. Indexed by country and level of development.
5.	Measuring the information society. ITU. <a href="https://www.itu.int">https://www.itu.int</a>	2020: The targets. 2015: Internet access. 2005–2015: Individuals using the Internet. 2005–2015: Household Internet access. 3G network coverage. 2014: Cyber security level. 2010 and 2015: Internet development induction. 2008–2014: Internet prices and speeds. 2000–2015: Fixed and mobile broadband subscriptions. Individuals using Internet. Household Internet access.	A report published in 2015. PDF format. Indexed by global, level of development, gender, region and country.
6.	Women's rights online. WWW Foundation. <a href="http://webfoundation.org">http://webfoundation.org</a>	2014: Internet user and access. Barriers to using Internet. Reasons for using social media. Internet use in political and economic issues.	A report published in 2015. PDF format. Indexed by gender, education, age and gender. For 9 countries.
7.	Men vs. Women: Who Is more active on social media? Iris Vermere. <a href="https://www.brandwatch.com">https://www.brandwatch.com</a>	2014: Internet user activity in social media.	A 2015 online article. PNG and BMP format. Indexed by gender. In 5 langs.
8.	Map of Internet users. Visually website. <a href="https://visual.ly">https://visual.ly</a>	2014: Internet users.	Last update in 2012. PNG format. Indexed by country and gender. <sup>a,b</sup>
9.	Internet users by country and gender. Gilly Wright. <a href="https://www.gfmag.com">https://www.gfmag.com</a>	2000–2014: Internet users.	Last update in 2014. JPG and TXT format. Indexed by level of development, country and gender. <sup>a</sup>
10.	Global Internet report. Internet Society Organization. <a href="http://www.internetsociety.org">http://www.internetsociety.org</a>	2007–2012: Internet users. 2008–2012: Fixed Internet subscriptions. Mobile broadband. 2010–2018: Fixed Internet traffic. 2011–2018: Mobile Internet traffic. 2013: Traffic generated different apps. 2014: Open and sustainable Internet survey.	Survey published in 2014. PDF format. Indexed by global, region and gender. For 20 countries.

Table 1 (continued)

Data source	Data	Notes
11. UNECE Statistical Database. UNECE. <a href="http://w3.unece.org">http://w3.unece.org</a>	1990–2016: Internet use	Yearly, quarterly and weekly updates. XLS, CSV and PX format. Indexed by age, gender and country. <sup>a,b</sup>
12. Over a quarter of the world's Internet users are aged 16–24. Global Web Index by Jason Mander. <a href="http://blog.globalwebindex.net">http://blog.globalwebindex.net</a>	Q3–Q4 2014: Internet users.	Article published in 2015. PNG and BMP format. Indexed by age (16–24), global and selected country. <sup>a</sup>
13. World Internet users. UN Data Organization. <a href="http://data.un.org">http://data.un.org</a>	1960–2015: Internet users.	Yearly updates. XML and CSV format. Indexed by global, region and country. <sup>a</sup>
14. Internet users - for all countries. Fact Fish. <a href="http://www.factfish.com">http://www.factfish.com</a>	1990–2011: Internet users.	Last update in 2011. SVG, PNG and BMP format. Indexed by country. In 3 langs. <sup>a,b</sup>
15. Internet users - country rankings. The Global Economy. <a href="http://www.theglobaleconomy.com">http://www.theglobaleconomy.com</a>	1960–2015: Internet users.	Yearly. Free for JPG. Not free for Excel and CSV format. Indexed by global, region and country. In 6 langs. <sup>a</sup>
16. Internet use and income. Internet Monitor. <a href="https://dashboard.thenetmonitor.org">https://dashboard.thenetmonitor.org</a>	2007–2014: Internet use and income.	SVG, PNG and BMP format. Indexed by country. <sup>a</sup>
17. Real time web monitor for internet traffic and attack. Akami. <a href="https://www.akamai.com">https://www.akamai.com</a>	Real time web monitor for Internet traffic and attack.	Continuous updates. SVG, PNG and BMP format. Indexed by country. In 8 langs.
18. Traffic data. Internet Traffic Report. <a href="http://www.internetttrafficreport.com">http://www.internetttrafficreport.com</a>	Traffic index, response times and packet losses.	Daily, weekly and monthly updates. GIF and BMP format. Indexed by region and country.
19. Fixed broadband subscriptions. Index Mundi. <a href="http://www.indexmundi.com">http://www.indexmundi.com</a>	Internet users.	Yearly updates. Indexed by region and country. <sup>a</sup>
20. Distribution of Internet users in Europe. Statista. <a href="https://www.statista.com">https://www.statista.com</a>	2014: Internet users in Europe.	Last update 2014. PNG, XLS, PPT and PDF format. Indexed by age. Sourced from more than 18,000 datasets. In 4 langs.
21. Internet users. ITU. <a href="http://www.itu.int">http://www.itu.int</a>	2008–2010: Internet users.	Last update in 2012. JPG and BMP format. Indexed by gender and country in Europe.
22. Internet users. Data Market. <a href="https://datamarket.com">https://datamarket.com</a>	1990–2015: Internet users.	Yearly updates. XLS, PDF, PPT, SVG, PNG, BMP, CSV and TSV format. Indexed by income and region. <sup>a</sup>
23. Internet users. FRED. <a href="https://fred.stlouisfed.org">https://fred.stlouisfed.org</a>	1990–2015: Internet users.	Yearly updates. XLS, PDF, PPT, JPG and CSV format. Indexed by global and country. <sup>a</sup>
24. Middle East Internet users to hit 413 million in 2015. Arabian Gazette Ayesha Sarfraz. <a href="https://arabiangazette.com">https://arabiangazette.com</a>	2015: prediction of Internet users in the Middle East.	Article published in 2013. JPG and BMP format.
25. Top 10 Internet countries in Africa. IT Web Africa by Gareth van Zyl. <a href="http://www.itwebafrica.com">http://www.itwebafrica.com</a>	2014: Most connected countries in Africa.	Article published in 2014. PNG and BMP format. Indexed by users and country. <sup>a</sup>
26. Africa's top 20 most connected countries. IT News Africa. <a href="http://www.itnewsafrika.com">http://www.itnewsafrika.com</a>	2015: Top 20 connected countries in Africa.	Article published in 2015. TXT format. Indexed by users and country. <sup>a</sup>
27. Africa Internet User Statistics. Statistic Brain. <a href="http://www.statisticbrain.com">http://www.statisticbrain.com</a>	2000 and 2015: Internet users in Africa.	Data published in 2016. TXT format. Indexed by country. <sup>a</sup>

**Table 1** (continued)

	Data source	Data	Notes
28.	Latin American Internet Audience Nears 310 Million. eMarketer. <a href="https://www.emarketer.com">https://www.emarketer.com</a>	2013–2018: Internet users in Latin America.	Article published in 2014. GIF and BMP format. Indexed by country.
29.	Internet User in the UK. ONS. <a href="https://www.ons.gov.uk">https://www.ons.gov.uk</a>	2011–2017: Internet users in the UK.	Yearly updates. XLS format. Indexed by age, gender, economy and location. <sup>a</sup>
30.	Internet Users in Georgia. IDFI. <a href="https://idfi.ge">https://idfi.ge</a>	2012: Internet users in Georgia.	Data published in 2013. PNG and BMP format. Indexed by regions, cities, operators and activities. <sup>a</sup>
31.	India to have the second-largest internet user base in the world. Your Story by Radhika P Nair. <a href="https://yourstory.com">https://yourstory.com</a>	2015: Internet users in India.	Article published in 2015. PNG and BMP format. Indexed by rural and urban area.
32.	Internet Users in the USA. NCES. U.S. Dept. of Education. <a href="https://nces.ed.gov">https://nces.ed.gov</a>	2013: Internet users in the USA.	Yearly updates. XLS format. Indexed by gender, race, age, education and income. <sup>a</sup>
33.	First Look: Internet Use in 2015. NTIA. John B. Morris. <a href="https://www.ntia.doc.gov">https://www.ntia.doc.gov</a>	2013–2015: Internet users in the USA.	Report published in 2016. PNG and BMP format. Indexed by age and education level. <sup>a</sup>
34.	United Kingdom fact file. Euro Monitor. <a href="http://www.euromonitor.com">http://www.euromonitor.com</a>	2011–2016: Internet users.	Yearly updates. TXT format. Indexed by country. <sup>a</sup> Some data not free.
35.	Share of the Internet users. Knoema. <a href="https://knoema.com">https://knoema.com</a>	2000–2015: Internet users.	Yearly updates. XLS, PPT, PDF, SVG, PNG and BMP format. Indexed by country. In 10 langs. <sup>a,b</sup>
36.	Internet use in the Middle East and North Africa. eMarketer. <a href="https://www.emarketer.com">https://www.emarketer.com</a>	2012: Internet use in Middle East and North Africa.	Article published in 2013. JIF and BMP format. Indexed by region.
37.	A snapshot of Internet use in Africa. PC Mag. by Stephanie Mlot. <a href="http://uk.pcmag.com">http://uk.pcmag.com</a>	2012: Internet use in Africa.	Article published in 2013. JIF and BMP format. Indexed by region. <sup>a</sup>
38.	Internet users. Internet World Stats. <a href="http://www.internetworldstats.com">http://www.internetworldstats.com</a>	2017: Internet users.	Yearly updates. TXT, PNG and BMP format. Indexed by region. <sup>a</sup>
39.	Internet topology data. CAIDA. <a href="http://www.caida.org/data/">http://www.caida.org/data/</a>	2017: Macroscopic Internet topology data kit.	Router level topology data on the Internet nodes and links.
40.	Internet topology data. Topology Zoo project. <a href="http://topology-zoo.org">http://topology-zoo.org</a>	2017: University of Adelaide project of Internet topologies.	250 datasets on various Internet networks at different scales.

<sup>a</sup> Other data available.<sup>b</sup> Various visualization options available.

**Table 2**  
Internet applications.

	Data source	Data	Notes
1.	World internet and digital future. Digital Centre Organization <a href="http://www.digitalcenter.org">http://www.digitalcenter.org</a>	2009–2015 and 2000–2016: Internet usage in social, political, media, entertainment, security and economy for selected countries.	Project reports. PDF format. Indexed by age, gender, income, location and education.
2.	Global internet usage. Build Export. <a href="https://build.export.gov">https://build.export.gov</a>	2013: Global internet usage.	A PDF report. Indexed by region, language, browsers, search engine, social media and mobile vs. desktop.
3.	Daily time spent on social networks rises to over 2 h. Global Web Index Jason Mander. <a href="http://blog.globalwebindex.net">http://blog.globalwebindex.net</a>	2012–2016: Time spent on social networks.	Article published in 2017. PNG and BMP format. Indexed by avg. daily time. <sup>a</sup>
4.	How people spent time on the Internet. Go-Gulf. <a href="https://www.go-gulf.com">https://www.go-gulf.com</a>	2012: How users spent time on the Internet.	Infographics published in 2012. GIF and BMP format. Indexed by global, activity, website and apps. <sup>a</sup>
5.	Internet access and use in Europe. European Commission. <a href="https://ec.europa.eu">https://ec.europa.eu</a>	2006–2008: Internet access and use in Europe.	Data published in 2008. PDF and DOC format. Indexed by country. <sup>a</sup>
6.	Internet usage in Asia-Pacific. Visually. <a href="https://visual.ly">https://visual.ly</a>	2000–2010: Internet usage in Asia-Pacific.	Infographic. JPG and BMP format. Indexed by selected countries.
7.	Internet usage in Asia-Pacific. comScore Inc. <a href="http://www.comscore.com">http://www.comscore.com</a>	2007: Internet usage in Asia-Pacific.	Data published in 2007. TXT format. Indexed by global, countries, region and avg. time spent on website. <sup>a</sup>
8.	Asia Internet Usage. SCRIBD. <a href="https://www.scribd.com">https://www.scribd.com</a>	2000 and 2010: Asia Internet Usage.	Data published in 2010. PNG and BMP format. Indexed by selected countries.
9.	Mobile Internet Usage in Asia-Pacific. Internet Society Organization. <a href="https://www.internetsociety.org">https://www.internetsociety.org</a>	2016: Mobile Internet usage in Asia-Pacific.	Report published in 2016. PDF format. Indexed by activity, operator, device, age and app.
10.	The Arab World Online 2014. Mohammed Bin Rashid School of Government. <a href="http://www.mbrsg.ae">http://www.mbrsg.ae</a>	2014: Arab world online.	Report. PDF format. Indexed by device, location, spending time, social media, age, income, and app. <sup>a</sup>
11.	Internet usage in the Middle East. Go-Gulf. <a href="https://www.go-gulf.ae">https://www.go-gulf.ae</a>	2001, 2012 and 2015: Internet usage in the Middle East.	Infographics published in 2013. Indexed by country and app. <sup>a</sup>
12.	Internet usage in the Middle East. Info Graphicspedia <a href="http://www.infographicspedia.com/author/admin/">http://www.infographicspedia.com/author/admin/</a> <a href="http://www.infographicspedia.com">http://www.infographicspedia.com</a>	Internet Usage in the Middle East. **Table 5.** More comprehensive datasets related to the Internet: These datasets often contain various other data in addition to the Internet data.

## 2. Experimental design, materials and methods

The most important data sources on the Internet usage containing the most comprehensive datasets are summarized in Fig. 1. The following two main strategies were used to find the relevant datasets. First, the World Wide Web (WWW) was searched using various combinations of keywords to find about 80% of the collected datasets. The keywords considered combined the word ‘Internet’ with one or more of the following search terms: traffic, database, data, access, usage, users, and statistics. The keyword search can be further modified, for example, by specifying the country or a region. The second strategy for finding the relevant datasets is to first identify the institutions which are known to be reporting various Internet related statistics, and then examine their websites. Overall, over 400 candidate websites were explored to select the relevant datasets. It is not surprising that often, but fortunately, not always, the high quality datasets (i.e., those which are reliable and regularly kept up to date) are only available to the paying subscribers. However, these pay-for-access datasets have been excluded from the survey. The main attributes of interest that were checked for when screening the datasets are: whether the data are provided for free, who is maintaining the dataset, how often the data are updated, in what format the data are available, and especially, what data are specifically provided and how they are indexed or categorized. Moreover, many international institutions have a policy to publish datasets with description in multiple languages. The total volume of data in each dataset varies significantly among the data providers including the time coverage and the availability of historical data. Most data seem to be normally accessible in smaller chunks, usually organized around a specific reporting purpose or issue.

**Table 5**  
More comprehensive datasets related to the Internet.

	Data source	Data	Notes
1.	Data hub. <a href="https://datahub.io">https://datahub.io</a>	Total 11,238 datasets with 312 about the Internet.	Different formats. In 47 langs.
2.	European data portal. <a href="https://www.europeandataportal.eu">https://www.europeandataportal.eu</a>	Total 764,778 datasets with 60,239 about the Internet.	Different formats. In 24 langs. European countries only.
3.	European Union Open Data Portal. <a href="https://data.europa.eu">https://data.europa.eu</a>	Total 10,850 datasets with 293 about the Internet.	Different formats. In 24 langs. EU countries.
4.	Internet live stats. <a href="http://www.internetlivestats.com">http://www.internetlivestats.com</a>	Live data about internet users, number of websites and apps.	Real-time data.
5.	ITU. <a href="http://www.itu.int">http://www.itu.int</a>	Datasets about broadband, Internet use, mobile-cellular and mobile-broadband networks in the world.	Yearly updated data. Different formats. In 5 langs.
6.	World Bank Group. <a href="http://www.worldbank.org">http://www.worldbank.org</a>	Total 774 million. Datasets about the Internet and other fields.	Yearly updates. Different formats. In 20 langs. Good for data on developing countries.
7.	Statista. <a href="https://www.statista.com">https://www.statista.com</a>	Thousands of datasets about the Internet and other fields.	Yearly updates. Different formats. In 4 langs. Free and non-free access.
8.	Info Please. <a href="https://www.infoplease.com">https://www.infoplease.com</a>	Lots of data about the Internet and other fields in the USA and in the world.	Yearly updates. Different formats.
9.	Ofcom. <a href="https://www.ofcom.org.uk">https://www.ofcom.org.uk</a>	Lots of data about the Internet in the UK.	Yearly updates. Different formats.
10.	FCC <a href="https://www.fcc.gov">https://www.fcc.gov</a>	Lots of data about the Internet in the US.	Yearly updates. PDF format.
11.	Pew Research Center. <a href="http://www.pewglobal.org">http://www.pewglobal.org</a>	Lots of data about the Internet and other fields in the USA and in the world.	Data polling, research and analysis. Yearly updates.
12.	Internet Society. <a href="https://www.internetsociety.org">https://www.internetsociety.org</a>	Data about the Internet.	Different formats and visualizations. In 8 langs.
13.	ONS. <a href="https://www.ons.gov.uk">https://www.ons.gov.uk</a>	Lots of data about the Internet and other fields in the UK.	Collect, analyse and publish data about the UK. Yearly updates. Different formats.
14.	Stat. Counter. <a href="http://gs.statcounter.com">http://gs.statcounter.com</a>	Data about the Internet.	Daily updates. Different formats and visualizations. Data from 2.5 million websites. Indexed by browser, device, country, region and app.
15.	Our World in Data. <a href="https://ourworldindata.org">https://ourworldindata.org</a>	Lots of data about the Internet and many other fields.	Free data research and analysis. PNG and BMP format.
16.	UN data. <a href="http://data.un.org">http://data.un.org</a>	Lots of data about the Internet and other fields also listing the UN organizations with the last and next update datasets.	Monthly updates. Different formats. Indexed by topic, country and time period.

Table 5 (continued)

	Data source	Data	Notes
17.	OECD. <a href="http://www.oecd.org">http://www.oecd.org</a>	Lots of data about the Internet and other fields.	Yearly updates. XLS format. Indexed by penetration, usage, price, service, speed and coverage. In 2 langs.
18.	The Global Economy. <a href="http://www.theglobeconomy.com">http://www.theglobeconomy.com</a>	Lots of data about the Internet and other fields.	Free and non-free data. JPG format. Other formats with free registration. Different visualizations. In 6 langs.
19.	Slideshare. <a href="https://www.slideshare.net">https://www.slideshare.net</a>	Total 18 million presentations in 40 categories, many containing data about the Internet and other fields.	Different formats. In 5 langs.
20.	Knoema. <a href="https://knoema.com">https://knoema.com</a>	Search engine for data.	Different formats. In 10 langs.
21.	Australian Bureau of Statistics. <a href="http://search.abs.gov.au">http://search.abs.gov.au</a>	Official data Australia including the Internet.	Yearly updates. XLS format.
22.	Internet Stats Today. <a href="http://internetstatstoday.com/">http://internetstatstoday.com/</a>	Live mobile usage statistics.	Live updates. Indexed by activity, device and app.
23.	Apira. <a href="http://www.apira.org">http://www.apira.org</a>	The Internet developments in countries in the Asia-Pacific region.	Survey reports and Internet data in different countries.
24.	ABI research <a href="https://www.abiresearch.com/">https://www.abiresearch.com/</a>	Research on technology markets.	Quarterly updates. Data and reports on the Internet, markets and technology. Registration required. Data access not free. <sup>a</sup>
25.	Eurostat <a href="http://ec.europa.eu">http://ec.europa.eu</a>	Lots of data about the Internet and other things in Europe.	Data about the Internet in Europe. Indexed by user, access, activity and security. Many formats.
26.	Pingdom <a href="http://royal.pingdom.com">http://royal.pingdom.com</a>	Data and analysis on the Internet.	Lots of data about the Internet and other fields.
27.	Strategy Analytics <a href="https://www.strategyanalytics.com">https://www.strategyanalytics.com</a>	Data on the Internet and other fields.	Lots of data and reports, but registration required.
28.	PWC <a href="https://www.pwc.com">https://www.pwc.com</a>	Investment data in the USA including the Internet.	Quarterly update. SVG, PNG and BMP format. Indexed by sector, region, state.
29.	UNCTAD statistics <a href="http://unctadstat.unctad.org">http://unctadstat.unctad.org</a>	United Nations Conference on Trade and Development. Data on ICT and Internet usage and economics.	Yearly update. IVT, XLS and CSV format. In 2 langs.
30.	Statistics Canada <a href="http://www.statcan.gc.ca">http://www.statcan.gc.ca</a>	Data on the Internet and other things in Canada.	Data about the Internet and other statistics.

<sup>a</sup> Other data available.

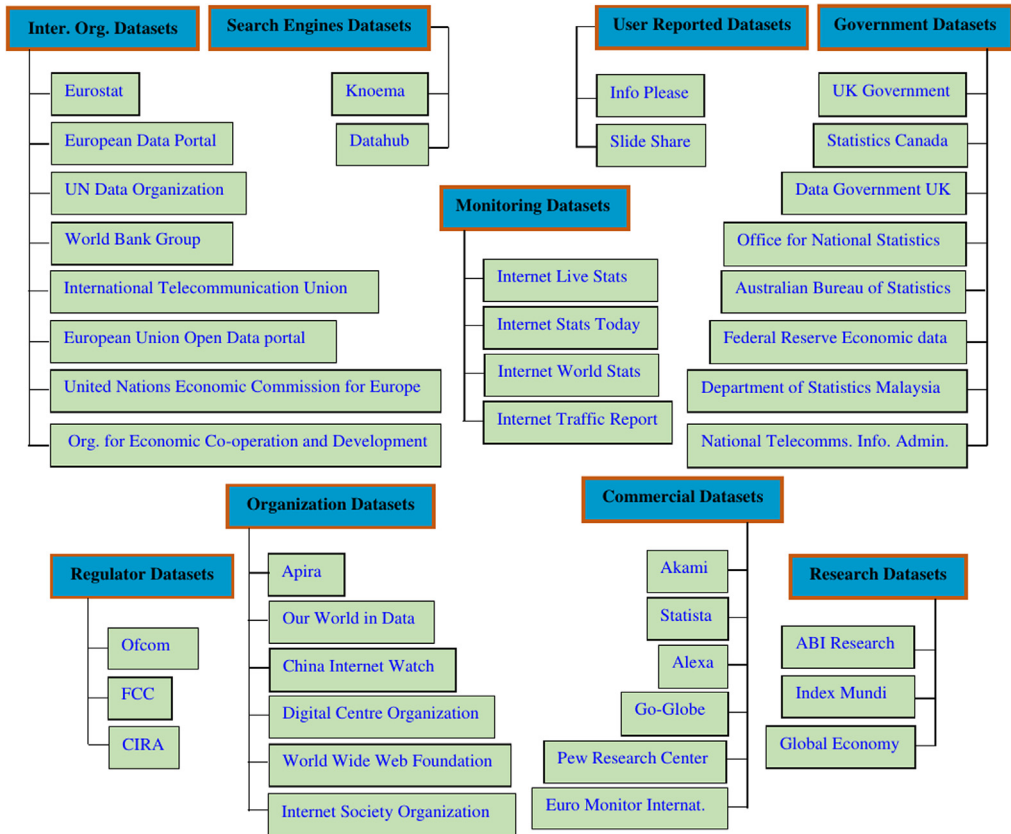

Fig. 1. The most comprehensive datasets on the Internet usage and other Internet statistics.

References [1–5] are recommended for performing longer-term traffic and applications forecasting in the Internet. The Internet measurement procedures are described in [6–9] whereas focus on measuring the digital economy can be found in [10–12]. Digitalization of the economy is explained in [13] while many technical and business aspects of digitalization of the Internet services are studied in [14]. The value of open access data and the associated data regulation are discussed in [15] and [16].

**Funding sources**

This work is part of a Ph.D. research work of Murooj Nadhom who received the full scholarship from the Iraqi Government. The grant is provided by the Iraqi Ministry of Higher Education and Scientific Research. The grant reference number is 1873.
